

Miller® Turbolite™

Product description

Turbo lite is a small, light and fully compliant retractable personal Fall Arrest Block designed to be used as a personal fall limiter arresting free fall within millimetres.

FEATURES

- Its retractable technology prevents trip hazards while its built-in swivel prevents life-line twisting.
- The Turbolite™ is extremely compact and lightweight.
- It provides 2m working capacity lifeline which attaches directly to the harness back D-ring for greater mobility and versatility.
- The high strength, impact-resistant nylon housing and engineered HiTech Polyester/Vectran Webbing provide more resistance to abrasion, increasing durability.
- The Turbolite™ eliminates the need for different fall protection equipment to address fall clearance and reduces risk as workers will always be using the proper equipment when fall clearance changes.
- The Turbolite™ can also be used in horizontal and foot level applications where an overhead anchorage point is unavailable (please read supplementary instructions on horizontal usage).

APPLICATIONS

- Construction
- Utilities
- Warehousing

Technical Information

- Length, bearing point to bearing point fully extracted: 2 meters. Actual manufactured length, bearing point to bearing point fully extracted: 81 .25± 1.0 inches (2.064 ± .025 meters)
- Weight 0.89kg
- Terminations: Stainless Steel Triple Action karabiner at top and 65mm opening aluminium scaffold hook at bottom.
- Certified for a 136kg user
- High impact nylon housing, S/Steel breaking mechanism, Polyester/ Vectran

Standards

- Conforms to standard EN 360
- Accepted under clause 1.6 of AS/NZS 1891.3
