

DuraHoist Adjustable Offset Upper Mast

Product description

The two-piece mast system comprised of the DH-21 and DH-22 lower mast extensions is designed to provide additional solutions for height-restrictive applications beyond the DH-3 one-piece mast. The modular design allows components to be used in multiple configurations. Multiple winches and/or self-retracting lifeline systems may be mounted as required. The tool-less design breaks the system into lightweight, manageable components for storage, transport, and setup.

APPLICATION RESTRICTIONS

- All winch and block mounting hardware must be supplied or approved by Miller.
- Retractable devices or shock absorbers must be installed and used in accordance with manufacturer instructions.
- Masts must be used with bases or sleeves approved for the applicable mast offset.
- Where required by regulation, each installation must be approved by a qualified engineer.
- All equipment must be set up and operated under competent supervision.

APPLICATIONS

- Confined Space.
- Rescue.
