

Söll MultiRail Horizontal Guided Rail System

Product description

The Söll Multi Rail is a horizontal guided rail that provides workers with a flexible fall arrest system. The Multi Rail system can be installed along the entire unprotected work area offering greater safety and mobility unlike other anchorage points (which limits the user's activity to the length of the lanyard).

Söll Multi Rail offers the advantage of greater fixing distances (up to 6m) and can be used by more people simultaneously (up to 6). The system allows installation at foot level, wall or overhead, and is available with 3 different types of gliders to suit these applications. It is easy to install with minimal components. A floating rail design allows for thermal expansion and minimum impact transmission to the structure in the event of a fall. Pre-constructed corner sections allow the system to be easily customised to a structure. The Stainless Steel Söll Multi Rail is ultra robust and suits the toughest environmental conditions. A lighter system in aluminium is also available.

FEATURES

- Three glider options are: closed, openable and a wheeled runner for overhead applications.
- The horizontal rail is available in fixed lengths of 6 metres and is pre-drilled for easy insertion.
- The rail supports offer users a choice of brackets for their mounting application.
- Connectors and bends provide workers with the flexibility of exit rail sections, connect rail sections together or move around corners.

APPLICATIONS

- Flat or steep roofs
- Hangers
- Ship yards
- Working platforms on masts and buildings
- Cranes
- Industrial plants

Technical Information

Parts are manufactured from a variety of materials including aluminium and stainless steel. Consult the installation manual and price list for more information

Standards

The Söll MultiRail system complies with EN 795 Class D

Ordering Details

PART NO	DESCRIPTION	MATERIAL TYPE
19146	63 Multi Rail section	Stainless steel
17332	Rail connector	Aluminium
17331	Horizontal bend	Aluminium
17407	Closed glider	Stainless steel
17792	Openable glider	Stainless steel
24168	MultiRail wheeled trolley-overhead use	Stainless steel
17404	Rail end stop	Stainless/alum
