

# Respiratory Protection

## 7600 Asbestos & Silica Kit

### Product description

The 7600 series full face mask asbestos and silica kit is the quality choice for workers requiring protection when working around asbestos contaminated material. The kit comes complete with 7600 series Full Face mask and P3 rated Pancake filters, plus 6 mask cleaning wipes. Pancake filters are flexible and lightweight, and coupled with the 7600 mask, allow for longer-wear times.

Plastic container packaging provides great storage for the mask and filters to keep them clean and to stop filters being clogged up with dust when not in use.

Handy Kits make filter selection easy!

### FEATURES

- Speech diaphragm amplifies workers conversation in noisy working environments.
- Handy Kits make filter selection easy!
- Pancake filters are flexible and lightweight for continuous wear.
- 100% silicone full face mask is latex free meaning no latex allergens & are safe for workers with allergies
- 5-strap head harness is evenly weighted and holds the mask for a secure fit, even during strenuous jobs requiring a lot of movement.
- Lens offers 200 degree field of vision for a wider viewing area in all directions. Superior downward view facilitates situations, where climbing up and down ladders may be needed.
- Approved to AS/NZS 1716 : 2012 Lic 0563. Pancake Filter P3 rating with a half mask provides protection against particulates including dust mist & fume.

### APPLICATIONS

- Suits applications where there is limited exposure to asbestos or silica related materials. Electricians, building, construction, maintenance. Refer to Limitations of use for further detail.

### Technical Details

#### Mask Material:

100% Silicone

#### Filters:

Includes a set of P3 rated flexible pancake filters

#### Limitations of use:

Not for use in IDLH environments including atmospheres with less than 19.5% Oxygen.

A respirator or RPE should be worn at all times by workers in any environment where asbestos is or suspected to be present to minimise the risk of breathing in asbestos. Before working with or around asbestos, please refer to Safe Work Australia, National Code of Practice for the Safe Removal of Asbestos or Worksafe NZ for guidance on how to manage and control asbestos in the workplace. This kit must NOT be used for restricted removal of asbestos.

For any mixture of asbestos types, or where the composition is unknown, the TWA (ppm) is set at .01 f/mL. Refer to <http://hsis.safeworkaustralia.gov.au> and [www.worksafe.govt.nz](http://www.worksafe.govt.nz) for more detail regarding Hazardous Substances and Exposure Standards.

#### Country of Origin:

USA

#### Standards

- Certified to AS/NZS 1716:2012 License SMK 0563
