- Heavy engineering
- Metal processing
- Mining and quarrying
- Welding
- Woodworking

CARE INSTRUCTIONS

Pro Choice hard hats should be inspected for any deterioration or damage prior to use. If any cracks, colour distortion or deep abrasions are found, the hard hat should be disposed of.

Industry recommends the hard hat shell to be replaced after 3 years of working life, the harness before 2 years of use and the sweatband as required.

To extend the working life of your hard hat, avoid excessive exposure to UV and any solvents. Clean your hard hat and harness with warm soapy water on a regular basis.
